

Hiring a Fibaform Kiosk can be the ideal solution where a temporary requirement arises, or where capital outlay is not desirable. Where a quick delivery, or short rental period is required, choose from the three models on this page as they are very often available from stock. Alternatively, if you would prefer to hire a kiosk with a different specification, e.g in your corporate colours or with different electrical specification, please see our Guardian Kiosks page. Every model is available for hire, but a longer lead time and rental term would normally be applicable.

Standard Hire Specification normally includes:

Glazing all round with at least one sliding window, a standard set of electrics: ceiling light and switch, 1 no. double switched socket, 2 kw wall mounted convector heater to consumer unit. Lockable door with fixed window.

Hire kiosks come with a heavy duty steel base and can be moved by forklift vehicle.

There is no minimum or maximum hire period and the kiosk can be purchased at the end of the hire period if required.

Normally, Standard Stock Hire kiosks are grey, but other colours may be available.

Standard Hire Kiosks

(usually available for immediate or short delivery)

Model	Width	Length	Height
1212	1200mm	1200mm	2250mm
