Complete Design and Build Service

Fibaform specialise in designing and manufacturing low to medium volume special application glassfibre products. These typically include cabins and housings requiring special features, non-standard size tanks and vessels, architectural mouldings and vehicle components. We work closely with our customers at the design stage to ensure that we not only meet the design criteria but also manufacture the product within budget requirements.

4.0m x 3.0 x 2.5m high potable water tank

We also offer a contract moulding service and can manufacture quality glassfibre mouldings at very competitive prices. We fully understand the need for a totally reliable service and pride ourselves on our ability to meet delivery schedules.

A selection of tanks and tank covers manufactured by Fibaform Products
